*?Members consistently report regaining control of their time and getting the business to work better for them while achieving growth of up to 200% year on year.*

*Why is this workshop different?*

*You will no doubt have seen many invitations to online masterclasses and webinars about growing your business so why is this one different?*

*Many of them are targeted at start-ups and "wannabe" business owners and entrepreneurs which is a massive market lapping up the free sessions - ours is for business owners who have at least a small team and an established customer base, and is not free so that we exclude those not right for it.*

*Many are actually about marketing and we all know that growing a business is not just about getting more leads (though that is important of course) - we focus on all functions of a business, so yes marketing and sales but also finance, operations and talent as it is all connected when pushing for growth.*

*Most of them are someone talking at you, so you have no chance to interact, share what you are thinking or hear from other business owners - we limit numbers and use breakout rooms so you get to speak with us and others. It's not about getting mass numbers in for us and more about providing a quality developmental experience.*

*Most have no follow up other than a possible upsell - we are including a bonus 121 strategy session with an expert coach to ensure your notes don't go in the bottom drawer never to be seen again! We want to help you to implement it and get as much out of it as you can.*

*Is this for you?*

*Would you like to feel 100% in control and on top of all aspects of your business?*

*Do you want to be totally confident you and your team are doing what you need on a monthly, weekly and daily basis to keep moving in the right direction and make your ambitions a reality?*

*Is there more work to be done to reach the level of freedom, financial success, lifestyle and satisfaction you want out of your business?*

*Is there more work to be done to ensure your business is performing as is needed to achieve the personal and professional success you want in the future?*

*Do you need to develop your roadmap for driving it to the next level towards achieving your goals?*

*If so, this workshop is for you.*

*"After attending this event me and my business partner were totally clear on how we needed to move forward and what to focus on next – we'd recommend it to any business wanting to grow!"*
